

Dear Doctor

Opting out of the Care.Data Programme

I am writing to tell you that I am opting out of the “Care.data” programme. This means that I am not giving consent for my medical information or the identifiable information of my dependents* to be transferred by you to the Health and Social Care Information Centre.

Please make sure that this information is not uploaded to the Health and Social Care Information Centre and note my opt out wherever necessary on your systems.

This includes including the “Dissent from secondary use of GP patient data”¹ and “Dissent from disclosure of personal confidential data by Health and Social Care Information Centre”² codes to the relevant records and making whatever other changes you need to reflect my choice on your IT systems.

I am aware of the consequences of opting out and that it will not affect the the provision of care and that I can notify you should I change my mind.

Yours,

Full name:	_____
